There was no sweep of the room and a transcript was taken. The meeting started at approximately 2:15 p. m. and lasted until about 5:15 p. m.

2. After reading the conclusions of the investigation of the Intelligence Community, the Director, with Mr. Lundahl's assistance, moved into an explanation with graphics of the flights during the period 29 August through 14 October. 25X1

4. There was considerable discussion at several points off the record concerning the desirability of issuing a public statement. Goldwater initially and then others were high in their praise of Mr. McCone personally and the work of the Agency and wanted this stated. Symington commented that while he was a close friend of the Director for many years, he did not think it appropriate to commend one person and thus being subject to the charge that they were impliedly criticizing other people. The words of praise for the Agency and the Intelligence Community included magnificent and outstanding. Senator Smith also

raised the point later that any commendation of individuals should be left out of any public statement on the grounds that it should not seem defensive. There was complete unanimity by the members present that intelligence had done an excellent job and that there should be some public statement on the findings of the Subcommittee and issued on an unanimous basis. At the conclusion of the hearing, Senator Stennis asked the Director for his views on a public statement and the Director said he would like to think it over. Stennis indicated he wanted to be careful on a release and in any event wished the Agency to review it for security before release. He agreed that the staff and Agency representatives would work this out.

5. Mr. McCone also raised the question of the handling of the transcript saying he would like to go on the previous arrangement of only two copies which would be held by the Agency and available at any time to the Subcommittee. Stennis stated that he would like to keep one in the Subcommittee files pointing out they had been furnished a safe by CIA many years ago. The Director stated that any reasonable arrangement could be worked out between Kendall and Warner. (Previously, as a result of a request from Kendall, I had asked the Director about availability of the transcript to DOD and the DCI had stated he wanted to stand by original arrangements.)

6. Action items include the following:
